

Every **Windsor Developments** home is built to an excellent A-rated energy standard and comes equipped with a solar PV system as standard, in partnership with **Apollo Solar Ltd**. This helps to significantly reduce your home's running costs compared with older properties of a similar size.

For even greater energy efficiency and lower running costs you can choose from one of the upgrade packages below.

PV BOOST

SOLAX X1 BOOST G4
UPGRADE YOUR INVERTER
TO A 3.6kW AND ADD
4 ADDITIONAL PANELS

Please note: Solar upgrades must be arranged with the builder in advance. Additional panels can only be installed while scaffolding remains in place. Roof size and orientation may limit the number of extra panels available, with smaller roofs quoted according to their capacity.

£1,640

BATTERY

The projected energy cost is calculated by considering a 7% increase in energy cost each year, due to trends in the raising cost of energy. This estimate is based on your selected preferences, current energy costs and the position and orientation of your roof to calculate the efficiency of the system. Projections are based on estimated usage of 4250 kWh per year, assuming Economy 7 Electricity Tariff. Your electricity tariff rates may change as a result of installing the system. You should contact your electricity retailer for further information.

Figures shown are for illustrative purposes only. Actual performance will vary depending on roof orientation, household electricity consumption and lifestyle.
